A wide range of solutions, available in different sizes, dimensions and colors, specially designed to meet the specific needs of the food and confectionery industry. Our products are ideal for both industry professionals and large-scale retail, always maintaining high standards of quality and performance.

Baking solutions for panettoni, colombe, and other pastries, muffin cups and small cases, as well as items for packaging and presentation. Our products ensure excellent performance and a flawless final result, combining functionality, aesthetics, and sustainability.

We strongly believe in a sustainable future and work actively work to make it a reality, developing compostable and recyclable products that can be easily reintegrated into the environment through natural processes. We use renewable energy sources and are committed to extending the useful life of our products, minimizing waste production.

Our journey towards sustainability focuses on one goal: a zero-emissions future. To achieve it, we have installed a photovoltaic system with 3,992 panels, capable of generating 2,460,000 kWh of energy per year. This is an important step in reducing our environmental footprint and contributing to a greener world.
